

# DataVac® Electric Duster

This multi-purpose Electric Duster is designed to blast dust, dirt and debris off of your home furniture and electrical appliances.

Its sturdy and modernized structure is lightweight but a powerful duster. It features a 500-Watt motor and is ideal for keeping household items, computers and other tech equipment clean.

Unlike traditional canned air blowers, it features greener power that is more eco-friendly. The ED-500 is more effective and cost-efficient when compared to other options.

The MetroVac DataVac® Electric Duster® is available at 120 volts and comes with a 12ft conductor cord, air-pin pointer, concentrator nozzle, air-flare nozzle and a four-piece detailing tool kit.

**Go green and save green.**
